

## Canteen charges April 2011 – March 2012

We have managed to keep our prices constant since April 2009 despite rises in the costs of ingredients, consumables, energy and delivery during that time. This is no longer feasible. Where ever possible there will be no increase at all and the overall average rise is less than 8p an item. The greatest rise will be for a jacket potato + hot filling of the day which is going up by 50p as it was under-priced originally and is not sustainable at that level. Without that item, the price increase is under 7% over the three years to 2012. We feel that our food is still good value for money and strict dietary guidelines are followed to ensure nutritious, well-balanced food is provided.

The new price list is shown below:

		£
